Rodrigo Araújo Maciel Pinheiro

Junior Web and Full-Stack Developer | Python Back-End

Cabedelo, PB, Brazil · rm20022101@gmail.com · GitHub · Portfolio · LinkedIn

Summary

Internet Systems graduate with academic and personal projects in web applications, REST APIs and responsive interfaces. Focused on Python/Django, authentication, permissions, relational persistence and automated tests, with React/Vite integration. Seeking a junior web, full-stack or Python back-end role.

Skills

Back end: Python, Django, Django REST Framework, FastAPI, Pydantic, JWT and OpenAPI.

Front end: React, TypeScript, JavaScript, Vite, HTML and CSS.

Data and tools: SQL, SQLite, PostgreSQL configuration/CI, Git, GitHub Actions, automated testing, Playwright and Docker Compose.

Academic and personal projects

- **Takion Campus:** academic portal with a Django REST Framework API and React/Vite interface; role-based permissions, courses, grades and attendance. Local SQLite demo and front-end/back-end tests.
- **Chamados API:** support-ticket API with JWT, requester/staff authorization, audit history and asynchronous notifications. OpenAPI and CI tests; local demonstration with no permanent public service.
- **Biya — Parallel Worlds:** React/TypeScript interface with visual worlds, an interactive gallery, PT/EN content and reduced-motion support. Documented artwork credits and usage policy.
- **Task Manager API:** FastAPI CRUD with SQLite persistence, Pydantic validation, OpenAPI documentation and regression tests.

Education

Technology Degree in Internet Systems — Centro Universitário UNIESP. Reported completion: **2026**.

Languages

Portuguese native. English (self-assessed): reading B2; listening and speaking B1; writing and interaction A2.
