

Rodrigo Araújo Maciel Pinheiro

Junior Back-End Developer | Python · Django · FastAPI · REST APIs

Cabedelo, PB, Brazil · rm20022101@gmail.com · [GitHub](#)

Summary

Internet Systems graduate focused on Python back-end development. Academic and personal projects cover REST APIs, authentication and authorization, relational databases, automated testing, and React/Vite integration. Seeking an entry-level software engineering role.

Skills

Python, Django, Django REST Framework, FastAPI, Pydantic, JWT, SQL, SQLite, PostgreSQL (CI), Git, GitHub Actions, unittest, OpenAPI, Ruff, Docker Compose; complementary React, Vite, and JavaScript skills.

Projects

- **Chamados API:** Django REST Framework support-ticket API with JWT, role-based access, auditing, notifications, and CI tests.
- **Task Manager API:** FastAPI CRUD with SQLite persistence, validation and tests; modernization merged via PR #2.
- **UPA Academic Portal:** Django REST Framework and React/Vite application with academic modules, role-based workflows and tests.

Education

Technology Degree in Internet Systems — Centro Universitário UNIESP. **Reported** completion: 2026.

Languages

Portuguese native. English (self-reported): reading B2, listening/speaking B1, writing and interaction A2.
